WORK EXPERIENCE

Department of Information and Communications Inc. – Information and Literacy Competency Development Bureau

Data Analyst | Developer Intern (February 2025 - April 2025)

- Focused on Processing and Handling of Tech4ED's Foot Traffic data and created templates to aid in logging of data for different Centers all over the country. Presented Processed Data based on each regions' Center Status and Foot Traffic to aid in understanding different sectors of attendees.
- Completed Sanitization checks, refactoring, and optimizations of modules within the Codebase and provided manual testing for bugs and errors.

RELATED EXPERIENCE

A collection of projects developed for various beneficiaries, including academic institutions and freelance clients, showcasing adaptability across different requirements and use cases.

- **Kingland Marketing Company Inc.**

Company: Kingland Marketing Company Inc. (January 2025 - Present)

Role: **Full Stack Developer**

Description: Developed and maintained a **relational database** using **MySQL**, and utilized **Laravel's** built-in tools to build three function-specific websites as requested by the company CEO:

- **kingland.ph** – Main company website
- **shop.kingland.ph** – E-commerce platform
- **admin.kingland.ph** – Internal admin dashboard

All sites were **hosted on GoDaddy** using **custom domains and subdomains**, with deployment optimized for reliability and scalability made easier using **GitHub Actions** and managed through **CPanel**.

- **CSC-eLearning.com**

Role: **Full Stack Developer**

Description: A lightweight mobile-only e-learning platform built using **Laravel** and **Tailwind CSS** for maritime students. It allows students to explore course modules and learning resources through a clean, interactive interface. Designed with usability and simplicity in mind to support students' learning experience online.

- **Personal Portfolio** (gregorio-portfolio.netlify.app)
 Role: **Website Designer | Front end Developer**
 Description: Built a personal project hub as a professional portfolio using **Next.js with TypeScript**, styled with **TailwindCSS**. The site is fully **responsive**, supports **dark mode**, and is optimized for performance and accessibility. Deployed via **free hosting platforms** (e.g., Netlify) to maintain economic efficiency.
- **PortalNest**
 Role: **Team Leader | Full Stack Developer**
 Product: Before our deployment to a company, my team and I were assigned to develop a simple **OJT (On-the-Job Training) Monitoring System** to assist in managing student requirements, documents, and submissions. I was responsible for **back-end development** and also served as **Team Leader**, overseeing overall project progress, coordination, and implementation.

TRAININGS

- **Google UX Design Professional Certificate**
 - Issued by **Coursera**
 - April 2025
 - Those who earn the Google UX Design Certificate have completed seven courses, developed by Google, that include hands-on, practice-based asses and are designed to prepare them for introductory-level roles in UX design. They can complement the design process from the end: empathizing with users, defining their bait points, coming up with ideas for design solutions, creating wireframes and prototypes, and testing design to get feedback.
- **Google AI Essentials**
 - Issued by **Coursera**
 - March 2025
 - Those who earn the Google AI Essentials certificate have finished five modules that are designed to prepare them to integrate AI into their work. They have a foundational understanding of AI principles and practitioners applying generative AI tools to workplace tasks. They have developed the skills to write clear and effective prompts, determine if an AI tool is right for a given task, and use AI responsibly. They have applied their knowledge through hands-on activities and assessments.
- **Database:MySQL**
 - DICT-ILCDB (April 14, 2025 - April 16, 2025)
 - The training was focused around fundamental principles including **Database Normalization** and SQL Query Functions.
 - Awarded **Best in Skills**

- **Partner: PCAP - Programming Essentials in Python**
 - Issued by **Cisco NetAcad**
 - December 2022
 - PCAP: Programming Essentials in Python is a course offered by Cisco Networking Academy in collaboration with OpenEDG Python Institute. This course provides fundamental knowledge and skills in Python programming, designed for individuals with little to no prior programming experience.

SKILLS AND SPECIALIZATION

Programming/Development:

- **Laravel Framework**
 - Proficient in building full-stack web applications using Laravel's ecosystem including routing, Eloquent ORM, Blade, Controllers, and Artisan.
- **Next.js with TypeScript**
 - Built responsive and SEO-ready frontend applications with server-side rendering and component-based architecture.
- **Tailwind CSS**
 - Used for crafting modern, responsive UIs with utility-first styling and dark mode support.
- **HTML5**
 - Proficient in writing semantic, accessible markup for responsive and component-based web interfaces, following modern web standards.

Database Systems:

- **MySQL**
 - Experienced in designing and managing relational databases with optimized queries and schema design.

Operating System:

- **Linux Desktop**
 - Familiar with Linux basics, terminal commands, and server configuration (currently working toward LPIC-1 certification).
- **Windows Desktop**
 - Proficient in using Windows for daily productivity, development tools, and basic system administration tasks.

Software Skills:

- **Microsoft Visual Studio Code**
 - Experienced in using VSCode as a primary code editor with extensions for PHP, JavaScript, TypeScript, and Laravel development, as well as Git integration and debugging tools.

AFFILIATIONS

- **Fatima Computing and Multimedia Society - Valenzuela**
 - **Head of Logistics Department** (August 2024 - June 2025)
 - Led the Logistics Department in managing end-to-end procurement, transport, and deployment of materials for all club activities and events. Key responsibilities included:
 - Supervised a team of logistics officers and volunteers to streamline operations
 - Coordinated with internal departments to ensure timely delivery of supplies and equipment
 - Collaborated with organizers on feasibility and flow to optimize attendee experience
 - Managed purchase and inventory tracking for event needs and project execution
 - Oversaw event layout planning, booth arrangements, and spatial logistics for both academic and social events
